

Google Earth:

Google Earth provides search capabilities and the ability to pan, zoom, rotate, and tilt the view of the Earth. It also offers tools for creating new data and a growing set of layers of data, such as volcanoes and terrain, that reside on Google's servers, and can be displayed in the view.

- Open Google Earth:
- Search Google Earth on google
- Lunch Google Earth
- Search India Gate
- People also explore (Other Famous Spot on the same place)
- Fly here
